FUNCTION

FUNCTION

- A function is a block of code which only runs when it is called.
- You can pass data, known as parameters, into a function.
- A function can return data as a result.
 - `def my_function():`
 - `print("Hello from a function")`
 - Return “Done”
 - `my_function()`
 - Let us try it out !

COWS AND BULLS

LETS BUILT THE BASICS STRUCTURE

- What all do we need to do ?
- Lets write 1 function
- HW - function on how to give cows and bulls.
